

LoanBurst

Learn about LoanBurst

LoanBurst uses the deflationary economy to control how loans are repaid by sharing 8% of token transferred to loan makers, BURST (burn) 2% forever and taken out of supply and 10% is deflated from each token transfer.

It is powered by secured smart contract-controlled loan dashboard

Deflationary

Deflationary associated with or tending to cause decreases in consumer prices or increases in the purchasing power of money.

Deflation

Deflation is a general decline in price for goods and services, typically associated with a contraction in the supply of money and credit in the economy. During the deflation process, the purchasing power of currency rises over time.

Deflationist

A deflationist is a person who is an advocate for deflation. In this context, a deflationist is an advocate for cryptocurrencies like Bitcoin (BTC) or the “deflationary by design” LoanBurst (LBURST).

Tokenomics

Tokenomics is a quality of a token which will convince users/ investors to adopt it and help build the ecosystem around the underlying project of that token.

Open trade of Uniswap at \$0.1

Token Listing on Coingecko

Continuous development and private team testing of the loaning layer in our own private sandbox

Official launch of the laonburst dashboard

**September
2020**

Continuous and consistent improvements on the loanburst framework. More features will be added

Nexy Road Map Update.

More exchanges to be announced

Possible Questions

How can I participate in LoanBurst?

Buy LBurst token, make a loan and start receiving dividends daily.

Where does the loan interest come from?

Loan interest is charged from the penalty charged on every transfer of tokens and every sell.

Why is LoanBurst burning 2% and sharing 8% to loan makers?

Our platform major use case is Loan repayment through smart contract, the burning is to ensure the token supply reduces. This will make Loan makers enjoy long-term return on their loan.

What features are expected on the loan-dashboard?

Loan-dashboard has the token value, the interest in 24hrs, the total loan in the loan contract and current market value, all in USD and in ETH.

Will LBurst be traded in many exchanges apart from uniswap?

Loanburst is a long-term project so more exchanges will enable more people see what the project does and creates more market reach.

Information

Loan Duration

Every loan lasts atleast 30 days.

Loan Contract Breakers

When you cut the loan contract by closing it before 30 days you get 20% penalty and shared to other loan creators
